

The quality, environment and safety scope of Pisa system is DEVELOPMENT, ASSEMBLY AND TRADING OF TELECOMMUNICATION AND ELECTRONICAL DEVICES in its Sevilla facilities.

PISA expounds its quality, environment and safety policy, which is based on error prevention and continuous improvement, aware of the need for its products and activities are aimed at improving interested parties satisfaction (as customers, governments, suppliers, stakeholders, workers, etc..).

All work done in a safe way is not only beneficial to the person who performs it, but also in the quality of work and respect for the environment and therefore in interested parties satisfaction.

Each and every one of the people that make up the company are responsible for managing those means and resources to achieve the proposed objective.

The pillars of this policy, which will always be present in our activity, are summarized below:

1º) Customers and interested parties.

The customer and remain of interested parties are our mainly aim, to know it to continuously increase your satisfaction is our goal.

PISA is committed to compliance with the applicable legal requirements, as well as other requirements that the organization subscribes to in terms of quality, environment and occupational safety and health.

Communicate their environmental policy and practices among suppliers, customers and stakeholders and promote awareness and environmental responsibility.

Encourage the diversification of activities using the knowledge and experience gained.

Take advantage of the opportunities offered by our interested parties, directing our manufacturing strategies to the development of outsourcing in low-cost countries.

2) Predict and prevent errors rather than control and correct them.

Identifying, understanding and prioritizing the significant risks inherent in our activity and implementing control mechanisms to mitigate its effects are the basis of the operational control of our performance.

It is PISA's principle to promote that quality, the environment and occupational health and safety are everyone's responsibility. Make things right at first, motto of daily work.

Prevent errors, waste and accidents, especially when designing, implementing new processes and products, with the aim of minimizing risks, consumption of resources and costs.

Pisa promotes the efficient use of logistical transports at all levels to reduce the environmental impact generated by fossil fuels.

Pisa encourages its affiliation with non-profit environmental organizations whose purpose is sustainability and environmental recycling.

3) Training and motivation.

It is permanent the formation of the people, planned and oriented to the improvement of its performance.

Teamwork and collaborative attitude are essential elements for achieving goals and objectives.

Encourage the participation of all workers by promoting an open communication environment.

4) Planning and monitoring.

The establishment of objectives, planning for its achievement, monitoring and correction of deviations is the operational and strategic basis of the company.

Continuous improvement in all areas is a fundamental variable for the future of the company. The results obtained in the management are valuable data to improve permanently, its planning and monitoring will be constant.

The continuous improvement of working conditions is a business purpose, for which special attention is paid to the non-occurrence of accidents and the improvement of manual loading operations.

The current society, which aspires to reach new levels of quality of life, requires us to improve our levels of quality and competitiveness.

Therefore, following our policy, it is necessary that each and every one of us who work at Pisa Electrónica identify with it.

Seville, September 21st,2017.

CEO: Francisco José Casado Ruiz.
